BOTOX

*How old you are is your business...
...how young you look is our business!*

BOTOX® Cosmetic is a simple, non-surgical procedure for temporarily reducing the appearance of moderate to severe vertical frown lines between the eyebrows. These lines, also known as glabellar lines, look like an "11" in adult women. BOTOX® Cosmetic reduces the activity of the muscles that cause these lines to form by blocking nerve impulses that trigger wrinkle-causing muscle contractions, creating an improved appearance between the brows. Results can last up to four months and may vary with each patient. BOTOX® Cosmetic is a prescription medicine that is injected into muscles and used to improve the look of moderate to severe frown lines between the eyebrows (glabellar lines) in adults for a short period of time.

BOTOX® Cosmetic is a prescription medicine that is injected into the area around the side of the eyes to improve the look of moderate to severe crow's feet lines in adults for a short period of time (temporary).
